

**Project Design Phase-I**  
**Solution Architecture**

Date	19 September 2022
Project Name	<i>Personal expense tracker</i>
Maximum Marks	4 Marks

**Team Members:**

Naveen M R - 195001305,  
Rohit A S - 195001308,  
Sai Sudarshan S - 195001309,  
Sreenidhi S - 195001310.

**Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

**Example - Solution Architecture Diagram:**

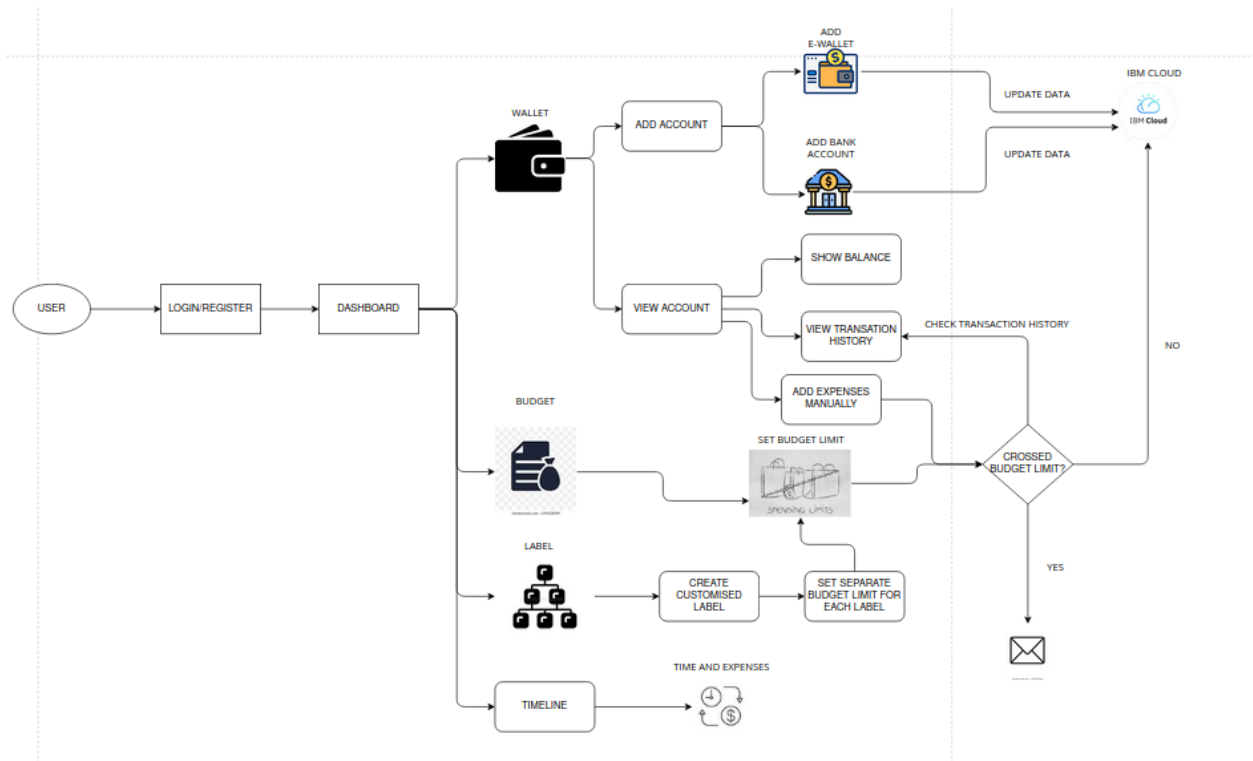

Figure 1: Architecture and data flow of the Personal expense tracker application
